

Earth

Music and Lyrics by Keith Herbert

ROSE

On Earth I'd gaze up at the sky
To watch the stars and fantasize
They'd light the way like tiny fires
Calling me to someplace higher
What a wondrous time to be alive

I could have stayed and lived my life
All the comforts for an easy ride
I jumped aboard a fast decision
To join a trip of someone's vision
Is this the time when worlds collide

Oh Earth has changed so many times
Magnificence and splendor
We made this world with our designs
Earth's nature as our mentor
What a wondrous time to be alive

We had our flaws but still we tried
Life adapts and Earth provides
Four billion years of constant change
Full of awe and sometimes strange
Throughout all time the Earth abides

Explored Earth's mountains to oceans deep
We walked the Moon, one giant leap
We packed our bags, we settled Mars
And searched for planets within the stars

We watch the Earth so very far
Our homeworld and our mother
And now the Sun is just a star
We travel to another
What a wondrous time to be alive
What a wondrous time to be alive
